

LEGEND

NON-INDUSTRIAL DIRECT CONTACT RCLS

- Extent of **PAH (Polycyclic Aromatic Hydrocarbons)** in excess of non-industrial direct contact RCLs (Residual Contaminant Levels).
- Extent of **LEAD** in excess of non-industrial direct contact RCLs (Residual Contaminant Levels).
- Extent of **TCE (Trichloroethylene)** in excess of non-industrial direct contact RCLs (Residual Contaminant Levels).
- Previous Site Investigation Area (Residual soil and groundwater contamination that is subject to restrictions).

INDUSTRIAL DIRECT CONTACT RCLS

- Arsenic
- Lead
- PAH
- VOCs (Volatile Organic Compounds)

Infrastructure

- Sediment Repository
- High Quality Building Foundation
- Site Boundary

NOTES:

- Soil contamination that exceeds non-industrial direct contact RCLs requires a cap for non-industrial use.
- Soil contamination exceeding industrial direct-contact RCLs requires a cap for industrial use.
